

A Database Of Geological Analogues For Exploration And

A Database Of Geological Analogues For Exploration And **FREE** a database of geological analogues for exploration and Department of Energy (DOE) . UK land well records (microfiche). [Re. Wytch Farm.] Department of Energy and Climate Change, 2010. British Government, Department of Energy and Climate Change - Oil and Gas. A Database of Geological Analogues for Exploration and SAFARI is a database of analogue information designed to facilitate better reservoir modelling and de-risking of exploration prospects It contains data from outcrops modern systems shallow seismic process based models and producing fields all underpinned by a common data standard and accessed through a simple secure web portal A unique aspect of the project is a 110 IHS International Exploration and Production Database IHS International Exploration and Production Database 2 The IHS International E and P Database is the most comprehensive and reliable dataset available to oil and gas industry professionals today Maintained in a unique relational data model it provides a fully integrated data area with more than 13 000 E and P attributes The database allows companies to compare rank and assess exploration and Geological maps and data SGU Geological maps and data The Document Archives at the Mineral Resources Information Office in Malå comprise a large number of maps exploration reports field notes drill core documentation work material and more GEOLOGICAL DATA INTEGRATION TECHNIQUES exploration and regional resource studies especially supporting decisions in the realm of regional planning Different geological geochemical and geophysical data as Geological Mapping Using Earth Observation Data and GIS The use of Earth Observation EO data for geological mapping applications is well established and can make a significant contribution to Oil and Gas exploration Construction of a Worldwide Analogues Database for Construction of a Worldwide Analogues Database for Naturally Fractured Basement Reservoirs France www.solegeo.com Seismic Attribute Applications and Merits for Exploration and Education P Th R De Beukelaar and O Medina The main objective of this work was to facilitate the otherwise tedious selection and compilation of essential literature and reading needed for exploration in a focused DATA MANAGEMENT AND MAP PRODUCTION IN THE GEOLOGICAL 25 Geological Survey of Finland Special Paper 48 Data management and map production in the geological mapping projects in Mozambique Fig 2 Flow chart of the data Natural Analogues for the Geological Storage of CO₂ The Nascent project Final report Foreword This is the final report of the Natural Analogues for the Storage of CO₂ in the Geological Environment NASCENT project Introduction to the Petroleum Geology and Prospectivity of The Introduction to the Petroleum Geology and Prospectivity of Sierra Leone is a report by PDSL and ERCL on the petroleum geology and prospectivity of Sierra Leone for licensing by potential investors CIM Mineral Exploration Best Practice Guidelines Data validation in an analogue format or a digital database includes all the checks done to make sure there are no errors or mismatches in the data e.g overlapping samples mislabeling of data mixed units etc CGG Robertson exploration focused geoscience tools and Robertson New Ventures Suite The Robertson New Ventures Suite is an integrated family of exploration focused geoscience tools and databases that provide a competitive edge in global new ventures screening and frontier exploration CGG Online reservoir analogue database for clastic Robertson Analogues Robertson Analogues formerly ERGO is an online

a database of geological analogues for exploration and

database of reservoir analogues and knowledgebase of geologic information designed to assist geologists and engineers with a range of development and exploration workflows
Stratigraphic Traps Quantitative Approach Based upon a •Assessment of stratigraphic traps is best achieved when supported by good understanding of the geology statistical analysis of geometric parameters and reality check against possible analogues from the database GEO ExPro Applying Analogues for Success How many of these actually are analogues for the Jubilee field in Ghana A technical evaluation team must analyse all available data types – seismic well logs test and production data cores and analogues – in making technical and business decisions in exploration and production The Shallow Marine Architecture Knowledge Store a The Shallow Marine Architecture Knowledge Store SMAKS is a relational database designed to accommodate data on the sedimentology physical stratigraphy and geomorphology of ancient and modern paralic to shallow marine depositional systems
