Linear algebra Wikipedia Until the 19th century linear algebra was introduced through systems of linear equations and matrices In modern mathematics the presentation through vector spaces is generally preferred since it is more synthetic more general not limited to the finite dimensional case and conceptually simpler although more abstract

Linear algebra is a sub field of mathematics concerned with vectors matrices and linear transforms It is a key foundation to the field of machine learning from notations used to describe the operation of algorithms to the implementation of algorithms in code
Matrix mathematics Wikipedia Definition A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined Most commonly a matrix over a field F is a rectangular array of scalars each of which is a member of F
